

You will feel differences and experience a spreading joy over time

STEP.3 Up!

Do this with an image of lifting your skin every 2 to 3 seconds.

You should feel as though you are lifting your skin outward from the center of your face. Rub in using the heat and pressure of your hand.

STEP.4 Finish!

Re-check the tension of your cheeks after two minutes and experience the feeling.

You will be able to feel the difference before your care once your skin becomes silky smooth. Continue on with your regular care (e.g. face lotion).

Your skin itself will be reborn after one month.
The secret to rewinding your skin time is inside.

Ample care for one month with this one bottle

NC Pre-care Essence [Moisturizing Beauty Lotion]30 ml 12,960 yen (including tax)

5 years in 2 minutes (clock icon) and 10 years in 1 month!

Rewind your skin time

Premium Collagen

Panax Ginseng Precare Essence

Premium Raw Collagen NC Pre-care Essence

Start with care before your face lotion

Magic for your skin!

Rewind your skin time 5 years in 2 minutes and 10 years in 1 month. This one bottle provides the immediate effectiveness and continued action long-awaited by women.

STEP.1 Check!

Touch your cheeks after washing your face to check the texture and position.

We call this "pre-care" because you do it before your regular care. First, check your current skin without makeup.

STEP.2 Push!

Push twice as a basic rule. Push once more in places you are concerned about.

Prepare your skin to capture the moisture ahead of your face lotion. Spread without unevenness over your whole face.

We have made available a video of a report in which you can see the changes. You can also check the detailed commentary on the useful ingredients!

Rewind your skin time with three functions!

Zoom in the skin

Enlarged View of the Horny Layer

Further zoom!

The outermost lamellar structure on the epidermis is composed of horny cells, the lipid layer and the water layer. If you neglect care of this, you will suffer a deficiency of phospholipids in the lipid layer. This also causes wrinkles and sagging.

Let's care for the lamellar structure!

Zoom into the smile lines you are concerned about!

1. Continued action with raw collagen!

	Raw collagen This is the collagen that people have the most of. This has a triple helix structure.
	Gelatin collagen This is the unwound triple helix of raw collagen.
	Hydrolyzed collagen This is further disassembled gelatin.

Up to six times the water retention!

This is a comparison of the types of collagen and their water retention capabilities

Secret to it being OK to store at room temperature:

It was accepted as only natural that conventional raw collagen had to be prepared directly before being used and then stored in a refrigerator. "bene" has eliminated this inconvenience. It is possible to store at room temperature and carry around with you because we use raw collagen resistant to heat taken from the scales of tilapia freshwater fish found in the basin of the Nile River!

2. Immediate action with Ceracute!

The secret to losing 5 years in 2 minutes!

I will take away

Double nanocapsule

The newly developed "Ceracute" ingredient pulls the wrinkles on your skin (e.g. smile lines) to regenerate elasticity and give you lift!

The secret to losing 10 years in 1 month!

3. Rebirth of your skin with lamellar care!

There is a formulation of three types of nanocapsule wrapped in lipids in the essence. Phospholipids charge where there is a lack of them at the same time as the useful ingredients are carried to where they are needed! This perfectly arranges the skin.

NC Pre-care Essence Permeation Image

- Phospholipids
- Raw collagen
- Hyalorepair
- VC ethyl

There is a strong formulation of ingredients to give you a feeling of immediate effectiveness. If you apply a little thickly, the ingredients may stick together and fine orbs may develop, but there is no problem with the quality or your skin.

Good job lamellar care!

Cared for and ordered lipid layer

Lamellar Care: Making a Foundation for Healthy Skin
The lamellar care of NC pre-care essence supplements phospholipids while delivering raw collagen to the water layer to improve the moisture retention capability! Furthermore, the delivery of diverse useful ingredients regenerates the skin from the base together with metabolism. You can look forward to your skin after a month!
